

Stretch your imagination playing with words

Principle of the game

Each round, simultaneously and using the same words, each player makes up a sentence. The player with the longest sentence wins.

How to use the words

Each word can only be used once per sentence.

The Joker allows an extra word to be added.

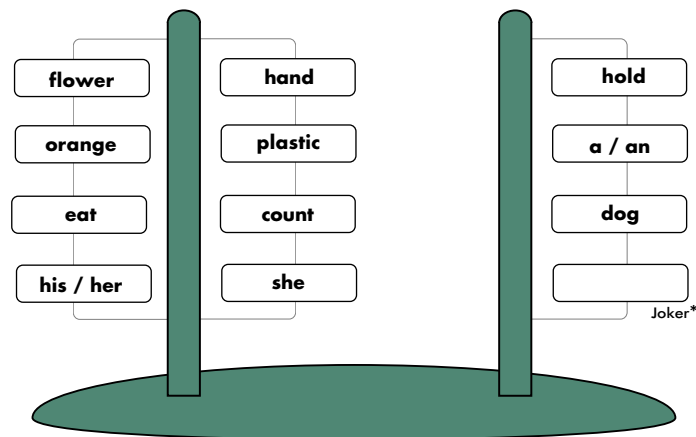

Some words can be modified. Examples:

flower → flowers girl + umbrella → girl's umbrella
count → counts, counting, to count, is counting, counted, ...

Example of a round

Each player creates a sentence from 11 words and the Joker.

The player who has the most words reads out his / her sentence and is declared winner of the round.

« Her dog is eating the plastic bag* »

Each round allows the creation of numerous word combinations.

« Her hand picks* flowers. » « She is handing beautiful* plastic oranges. »...

You can vary to the game by allowing outlandish sentences.

example : « She is counting the* orange dogs. »
